

London City Bond Limited

ENERGY POLICY STATEMENT

- ✓ London City Bond Ltd. is committed to the review of opportunities to reduce energy consumption within the commercial constraints of ensuring a sustainable business model for the on-going stability of its customers and employees; this is achieved by listening to the needs of our customers, minimising stock movements, equipment resource allocation and appropriate route planning for product delivery.
- ✓ London City Bond Ltd. is committed to continually improving energy consumption and the management system by ensuring our awareness of new energy technologies, energy service provider monitoring and regular dialogue reporting as confirmed by a documented management system against the requirements of ISO 50001 and industry best practice principles.

London City Bond Ltd. establishes the above philosophies of the organisation by ensuring the continuation by the following:

- Identifying the necessary resources to meet with the customer and specified legal requirements with due consideration to maintaining performance targets.
- Compliance with internal processes and procedures to achieve declared aims supported by documented records at all appropriate levels.
- Evaluate the efficiency of the business system by prioritised compliance and operational system related internal environmental audits.
- Maximum communication between customers and suppliers in support of service compliance and product traceability.
- Motivate and encourage inclusion of technical and administration personnel at all levels through training and competency reviews.
- Review of the business through regular management and operational meetings.
